

SERVICE OVERVIEW

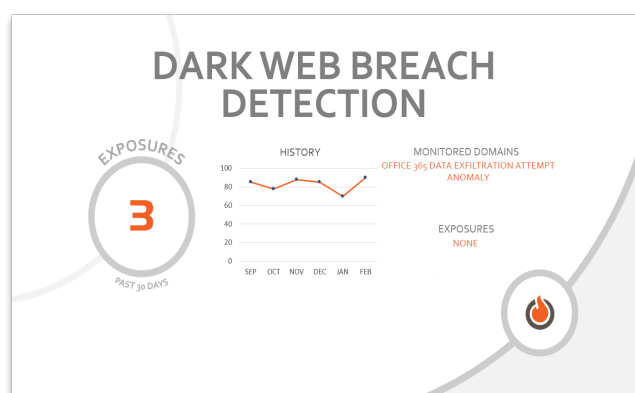

DARK WEB BREACH DETECTION

Our Dark Web Breach Detection service assesses organizational exposure due to stolen credentials, Personally Identifiable Information (PII), intellectual property or other protected information. OrbitalFire experts continuously search underground and criminal databases for stolen or leaked confidential information.

BENEFITS

- o Improved Exposure Analysis
- o Expedited Proactive Intelligence

FEATURES

- o Continuous searching of underground and criminal repositories ensures complete discovery of compromised assets.
- o Automatic and instantaneous alerting on discovered assets ensures timely investigations and analysis.
- o Comprehensive searching of known dark web dump sites, forums, chats, IRCs and other repositories ensures complete visibility to compromised assets.
- o Custom search terms ensures discovery of unique proprietary information.
