

# AI READINESS ASSESSMENT

AI tools are already showing up across everyday small business operations, from writing, researching, summarizing, and more. That can create real value, but when usage is informal or invisible to leadership, it can also introduce risk. The OrbitalFire AI Readiness Assessment gives you a clear picture of how AI is being used in your business and what that means for your risk, governance, and accountability.

## BENEFITS

- o Clear visibility into how AI is actually being used across your business
- o Identified risks, policy gaps, and governance weaknesses before they become problems
- o Practical, prioritized recommendations you can act on right away

## WHY WE BUILT THIS

We built this assessment to give you a clear, practical way to understand how AI is being used in your business and what steps make sense to manage it well.

## FEATURES

- A structured review of your AI landscape, assessed against the NIST AI Risk Management Framework 1.0, with practical recommendations delivered at the end.
- o Inventory of which employees are using AI and which tools and services they rely on
  - o Evaluation of your current AI policy for adequacy and effectiveness
  - o Assessment of employee training and awareness around the rules of AI use
  - o Identification of unknown risks AI is creating in your business

# AFFORDABLE, OUTSOURCED **CYBERSECURITY** SERVICES FOR SMALL BUSINESSES

## REGULATORY COMPLIANCE

Compliance expertise across industries, including Manufacturing, Healthcare, Finance, Auto, and more.

## INTRUSION & THREAT DETECTION

24x7 automated detection of threats, intrusions, and other malicious activity.

## AWARENESS TRAINING

Continuous and automated employee training, education, and newsletters.

## VULNERABILITY MANAGEMENT

Automated scanning of computers, servers and devices for vulnerabilities.

## COMPREHENSIVE ASSESSMENTS

Comprehensive evaluation of your security posture, policies, procedures, and systems.

## CLOUD SECURITY

Secure your most critical assets in the cloud, including Office 365.

## VIRTUAL CISO

Guidance and assistance with all things cybersecurity.

## POLICY & PLAN DEVELOPMENT

Comprehensive strategy development to strengthen security and protect against potential threats.

## INCIDENT RESPONSE TABLETOP

Test and assess your Incident Response capability in a realistic, safe, and controlled environment.

## INCIDENT RESPONSE

Advanced investigative services during cybersecurity events .

## PENETRATION TESTING

Realistic but safe simulation of cybercriminal attacks.

## CONFIGURATION MANAGEMENT

Regular, automated scanning of computers, servers and devices for configuration errors and weaknesses.

## DARK WEB BREACH DETECTION

Automated detection of threats, intrusions, hacking, and other malicious activity.
